

Precious Metal Tester GK Series

GK series are the GOLDTESTER with our developed software which evaluates purity of Precious Metals.

Features

1. GKs can check purity to confirm if marked stamp on gold (platinum) is correct or not.
GKs are very useful to check most common type of fake gold: lower purity than marked stamp on gold (platinum).
2. Gold (platinum) which outside covered real gold (platinum), and inside with other metal can be detected.
3. Non-gold (platinum) metals can be distinguished.
4. Can be measured scrap gold at a time and show average purity.
5. Also function as a normal gram scale and Densimeter.
6. Display Gold K9-K24 & % (GK-300:99%, GKS Series:99.9%)
Display Platinum 600 – 1000 & % (GKS Series)

Precious metals which are not able to be tested with GKs

1. With hollow.
2. With any stones (have to remove them when testing)
3. Materials which have close density to gold (platinum)

Easy operation in 20 Sec.

① Measure weight in air

② Measure weight in water

③ Result

GKS - 300

High precision model

Precious Metal Tester GKS-300
Gold /W Gold / Platinum
Up to 300g / 0.001g
Precision model of resolution of 0.001g.
Minimum 2g sample can be measured.

Features

- Gold /W Gold: Lo, K9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24 & purity 99.9%
- Platinum: Lo, 600, 650, 700, 750, 800, 850, 900, 950, 1000 & purity 99.9%
- Density: 0.001g/cm³
- Measuring range 0.001 to 300g
- Minimum weight 2g
- Weight /Dimension: 2.8kg / 260×190×200mm
- Power Supply AC100-240V
- Airtight windshield, Calibration weight equipped
- Option: Compact printer

GKS - 3000

High capacity model

Precious Metal Tester GKS-3000
Gold /W Gold / Platinum
Up to 3000g / 0.01g
Ingot, gold bar, statue up to 3kg.
No need to cut or drill gold, but just check density, and distinguish immediately. Useful for checking scrap gold at a time as well.

Features

- Gold /W Gold: Lo, K9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24 & purity 99.9%
- Platinum: Lo, 600, 650, 700, 750, 800, 850, 900, 950, 1000 & purity 99.9%
- Density: 0.01g/cm³
- Measuring range 0.01 to 3000g
- Minimum weight 10g
- Weight /Dimension: 4.2kg / 260×240×240mm
- Power Supply AC100-240V
- Option: 2kg calibration weight, Airtight windshield, Compact printer

GK - 300

Basic model

Precious Metal Tester GK-300
Gold
Up to 300g / 0.01g
Long seller popular basic model.
Simply easy, and accurate.

Features

- Gold: Lo, K9, 10, 12, 14, 16, 18, 20, 21, 22, 23, 24 & purity 99%
- Density: 1 to 0.01g/cm³ (depends on weight of sample)
- Measuring range 0.01 to 300g
- Minimum weight 5g
- Weight /Dimension: 1.54kg / 218×190×170mm
- Power Supply AC100-240V
- Calibration weight equipped
- Option: Airtight windshield, Compact printer
